Application No. 10/824,218

AMENDMENTS TO THE SPECIFICATION:

Please substitute the following amended paragraph for the pending paragraph [0001] on page 1:

[0001] There is illustrated in U.S. Patent 6,800,411 ~~depending U.S. Serial No. 10/369,797, filed February 19, 2003, entitled Photoconductive Imaging Members~~, the disclosure of which is totally incorporated herein by reference, a photoconductive imaging member comprised of a substrate, a photogenerating layer, and a charge transport layer containing a binder and a compound, monomer, or oligomer containing at least two (methyl)acrylates.

Please substitute the following amended paragraph for the pending paragraph [0002] on page 1:

[0002] There is illustrated in U.S. Patent 6,913,863 ~~depending U.S. Serial No. 10/369,816, filed February 19, 2003, entitled Photoconductive Imaging Members~~, the disclosure of which is totally incorporated herein by reference, a photoconductive imaging member comprised of a hole blocking layer, a photogenerating layer, and a charge transport layer, and wherein the hole blocking layer is comprised of a metal oxide; and a mixture of a phenolic compound and a phenolic resin wherein the phenolic compound contains at least two phenolic groups.

Please substitute the following amended paragraph for the pending paragraph [0003] on page 1:

[0003] There is illustrated in U.S. Patent 6,824,940 ~~depending U.S. Serial No. 10/369,812, filed February 19, 2003, entitled Photoconductive Imaging Members~~, the disclosure of which is totally incorporated herein by reference, a photoconductive imaging member containing a hole blocking layer, a photogenerating layer, a charge transport layer, and thereover an overcoat layer comprised of a polymer with a low dielectric constant and charge transport molecules.

Application No. 10/824,218

Please substitute the following amended paragraph for the pending paragraph [0004] on page 1:

[0004] Illustrated in U.S. Serial No. 10/408,204, filed April 4, 2003, entitled Imaging Members, U.S. Publication No. 20040197685, the disclosure of which is totally incorporated herein by reference, is a photoconductive imaging member comprised of a supporting substrate, and thereover a single layer comprised of a mixture of a photogenerator component, charge transport components, and a certain electron transport component, and a certain polymer binder.

Please substitute the following amended paragraph for the pending paragraph [0005] on page 2:

[0005] Illustrated in copending application U.S. Serial No. 10/144,147, entitled Imaging Members, filed May 10, 2002, now abandoned, the disclosure of which is totally incorporated herein by reference, is a photoconductive imaging member comprised of a supporting substrate, and thereover a single layer comprised of a mixture of a photogenerator component, a charge transport component, an electron transport component, and a polymer binder, and wherein the photogenerating component is a metal free phthalocyanine.
